About Sword Mans: Games at R.U.S.E. are highly refined play experiences built on a foundation of genuine love for video games and the entertainment industry. R.U.S.E. is devoted to providing a quality gaming experience to its players, and with its exciting new genres, Sword Mans will give players all the hit style of a classic brawler, backed by the physics accuracy of a modern game. Content: World Sword Mans was built from the ground up to feature some of the

most revolutionary aspects of video game play. With a background in game design, R.U.S.E is firmly committed to delivering the full spectrum of gameplay and rich entertainment experience that players seek out. Sword Mans features a unique over-the-shoulder view of the action, a game engine that dynamically adapts to the user's ever-changing perspective, and a radical physics-based damage system that makes each swordsman a living, breathing character with real damage that occurs in time with the screen frames. With these innovations, Sword Mans is poised to deliver the most realistic brawling experience in video game history. Game Engine Sword Mans runs on a new engine that is unique in video gaming. Instead of relying on a 2D visual system to create the illusion of depth, players experience over-the-shoulder 3D play with the 3D engine designed specifically for Sword Mans. This unique design allows players to feel the impact of collision with the world as they swing, dodge, and parry their opponent. The character's body model dynamically changes depending on the direction the character is facing, and the environment, including walls and stage hazards, react with the controller movement. Physics based damage Sword Mans features a

physics-based damage system that sets it apart from other sword fighting titles. Sword Mans is more than just a game - it's a sword fighting simulation. Your character's arm has a realistic mass, meaning that when it's swung, the arm moves in an authentic manner. Your sword's weight and length has a physical effect on how well you can use it in combat. Damage is a manifestation of this realism. Your swordman will flop when he's hit or when he defends another player's swordman. The more damage a player receives, the more exposed he becomes to attacks. Every part of the arm and the body reacts to damage, allowing players to feel the blood, sweat, and pain in their favorite form of entertainment. GUI System Sword Mans has a c9d1549cdd
